## COURSE OVERVIEW

This program defines **the next generation of options for women** with abnormal benign conditions that require surgical and/or medical treatment. Understanding the changing landscape of medicine, this program has incorporated the triad of care that one must consider when providing surgical care to the female patient.

As a healthcare provider, this program will endorse the movement that we see occurring that emphasizes data collection with outcomes transparency, lowering surgical cost, while improving patient satisfaction scores. Course will include **surgical risk reduction** with hysteroscopy, laparoscopy, vaginal and robotic surgery.

## TOPICS COVERED

Heavy Menstrual Bleeding  
Chronic Pelvic Pain  
Fibroid Disease  
Endometriosis  
Adhesions

## SOLUTIONS for

Surgical Bleeding  
Single Site Robotics  
Percutaneous Instrumentation  
Scarless Hysterectomy Techniques
